## 1. CABLE TRAYS (continued)

Perforation details :

## 1. CABLE TRAYS (continued)

PVC cable tray can be installed in both commercial and industrial environments.

- Damp, saline environments:

Ports, offshore installations, purification stations, spas, swimming pools, airports, railways stations, bridges, etc...  
The specific characteristics of PVC combined with Legrand's expertise in cable tray systems provide a product solution that is both easy and safe to install... whatever the site, whatever the configuration.

- Industrial environments;

Chemical or petrochemical sites, paper industries, food processing, etc...

- Commercial sector:

Storage areas, car parks, offices, service ducts, etc...

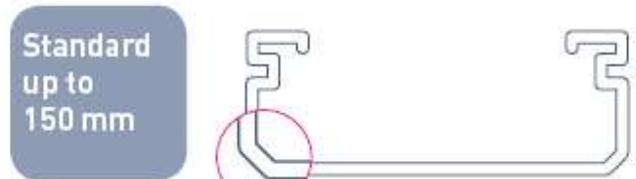

- Indoors or outdoors:

Can be installed outdoors as the whole range offers UV protection and weatherproofing

17 profiles available :

3 depths : 50/75/100mm  
Width 75 to 600mm

Perforated and unperforated, standard and reinforced profiles

Totally flat profile, optimising the cabling capacity

With 2 ribs on the base to take higher loads

Advantages :

PVC is corrosion-free and has excellent resistance to chemical agents and damp environments, giving it a long service life. A product that lasts longer needs to be replaced less quickly and thus generates less waste and material to be recycled

PVC is light to handle and transport. It is easy to cut, perforate or join together and causes little damage to cables or injury to hands. It does not need to be earthed.

Choosing PVC cable trays is also environmentally responsible, as PVC is a 100% recyclable material, both physically and chemically, and in terms of energy.

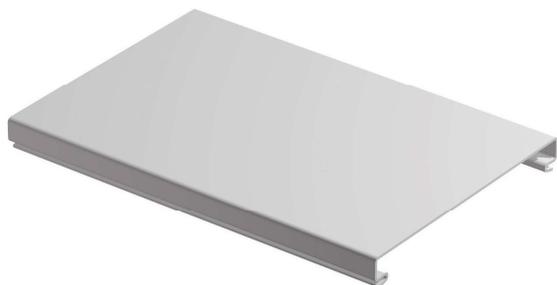

PVC cable tray range fully complies with the requirements of the RoHS directive, which stipulates the elimination of several substances that are hazardous for the environment and for health.

## 4. SUPPORTS (continued)

### 4.1 Cantilever arms ref 6377 66/67/68/69 & 6379 78/79/80/81 (continued)

Two types of installation:

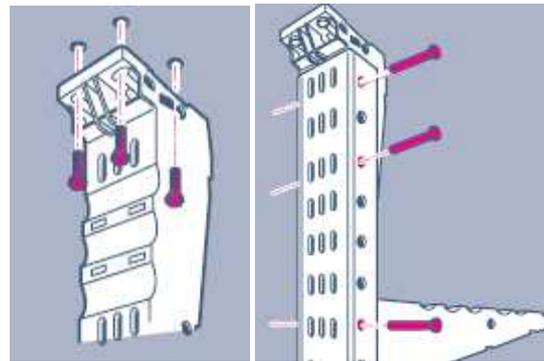

Wall fixing or ceiling fixing when used as pendant = oblong hole (hole at top)

Fixing profile to wall :

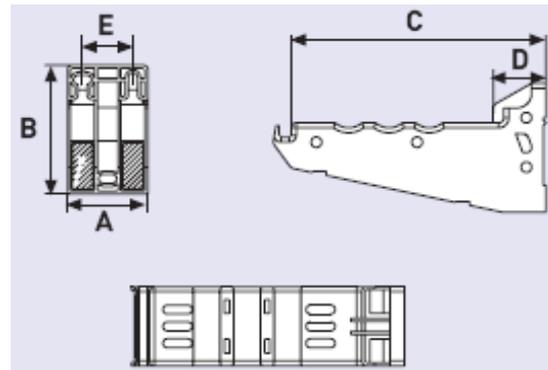

Fixing to the ceiling

System with ceiling pendant support

Dimensions in mm:

Cantilever arms PVC:

Code	A	B	C	D	E

## 4. SUPPORTS (continued)

### 4.4 Pendant channels PVC 2m ref 6379 50

Delivered in lengths of 2m  
Pack by 8m

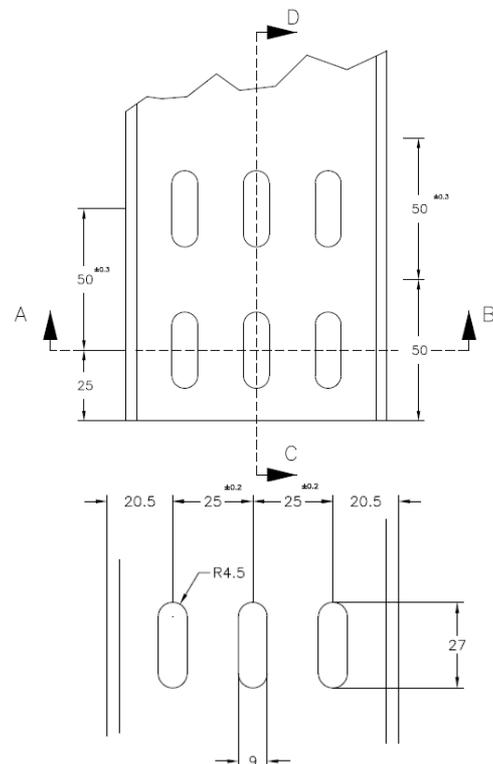

Dimensions in mm:

Note, bending moment: 7 daNm profile only.

A	B	C	D
83.5	50	50	25

Perforation details :

To fix pendant channels with ceiling brackets, use the nut and bolts M8x20

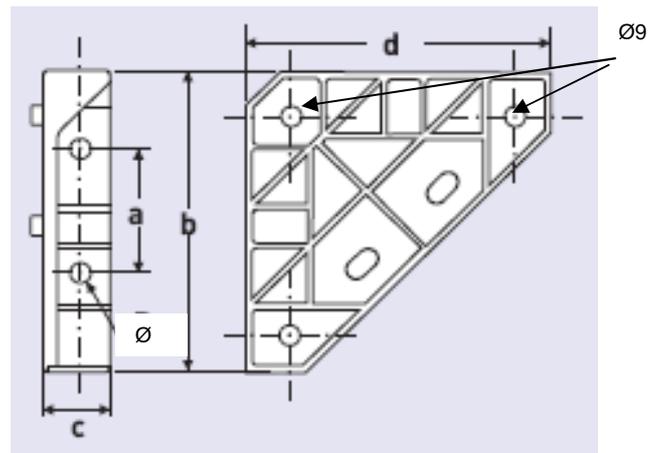

## 4. SUPPORTS (continued)

### 4.5 Ceiling brackets PVC ref 6379 55

To use with pendant channel PVC ref 6379 50  
Pack by par 8

Dimensions in mm:

a	b	c	d	Ø
56	136	30	136	10

To fix pendant channels with ceiling brackets, use the nut and bolts M8x20

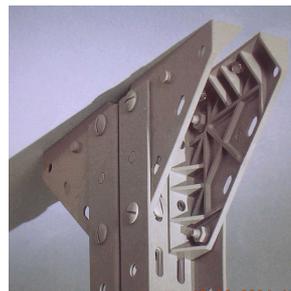

Ceiling brackets allows to have ceiling pendant single (use 2 ceiling brackets + 1 pendant channel)

SWL, safe working loads on vertical

SWL, safe working loads in daN on vertical = 310 daN maxi

Ceiling brackets allows to have ceiling pendant double (use 4 ceiling brackets + 2 pendant channels)

### 4.8 Rapid fix rivet PVC ref 6379 54

Dimensions in mm:

a	b	c	d
18.2	15	5	9

To use for horizontal fixing only

Pack by 100

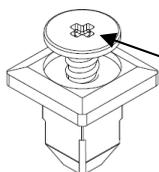

Weight : 2.1g

Quick fixing rivets :

Push in the rivet

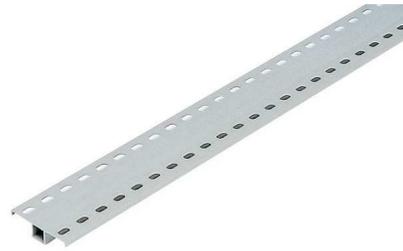

Just press and it's fixed

To unscrew, use a tool

## 4. SUPPORTS (continued)

### 4.9 Tele rail 80x19.6 ref 6379 56

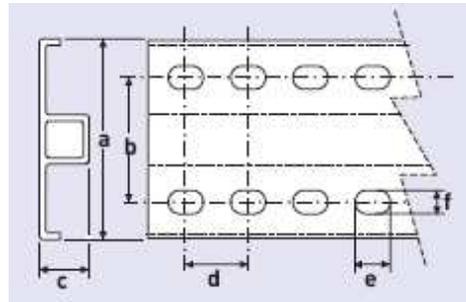

- to fix on floor or on wall  
- also used as bottom stiffener to join cable tray of width 400-600mm

Delivered in lengths of 2m

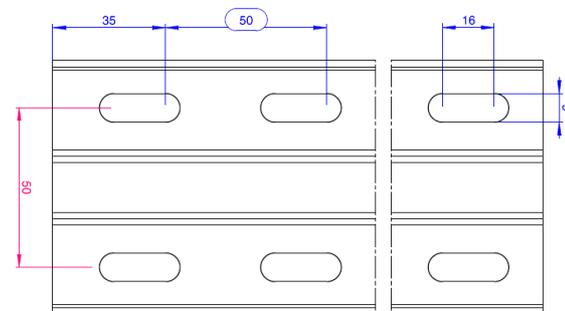

Pack by 42m

Dimensions in mm :

a	b	c	d	e	f
80	50	19.6	50	25	9

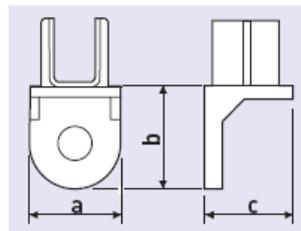

Perforation details :

### 4.10 Tele rail end cap ref 6379 57

To clip directly on Tele rail and allow the fixation in extremity  
Pack by 20

Dimensions in mm :

a	b	c
20	22.5	20

Do not use for suspending tele rail

## 5. TECHNICAL CHARACTERISTICS

### Cable loading information

The table below gives safe working loads (SWL) in daN/m.

SWL are acceptable up to 40°C for span of 1.5m and 60°C for span of 1m, on the European test standard IEC 61537

Profile widths (mm)	Profile depths (mm)		
	Depth 50	Depth 75	Depth 100
75	7	12	-
100	10	16	-
150	15.5	25	-
200	19.5	35	42
300	27	48	66
400 <sup>(1)</sup>	41	70	90
500 <sup>(1)</sup>	-	-	113
600 <sup>(1)</sup>	-	-	135.5

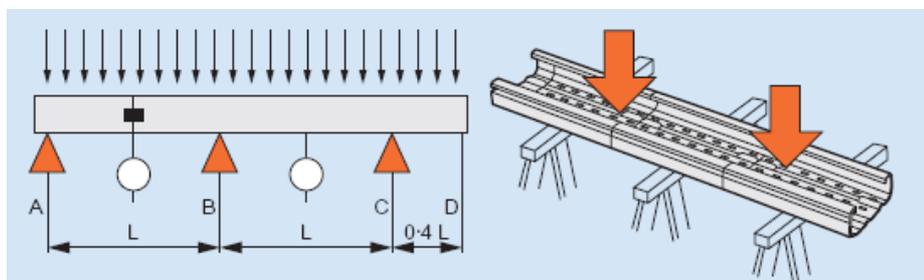

(1) Reinforcement across the joint using a tele rail marked during tests

Safe working load test :

The test for cable loading conforms to EN 61537 test type 1

The following conditions apply to the test as shown in diagram below

- 1- the cable tray is supported at 1.5m spans and not fixed to supports during tests
- 2- the coupler joint is at the centre of support A – B
- 3- the fixing torque for coupler bolts is 2.5 Nm
- 4- the test load is a uniformly distributed load (UDL) over the test area of 2 spans and cantilever
- 5- the longitudinal deflection on a span is limited to span length divided by 100
- 6- the transversal deflection reached in the centre of the cable tray base is limited to tray width divided by 20

### ■ Fixing pipes

Special holes have been designed for fitting clamps so that pipes can be fixed on the bracket

### ■ Attaching the covers

For easier installation, the cover can be simply hooked on the bracket during maintenance operations

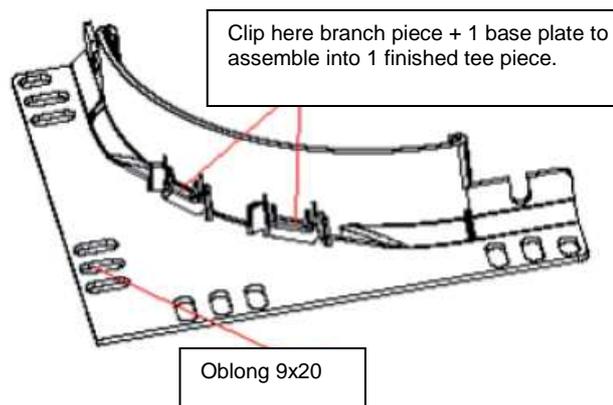

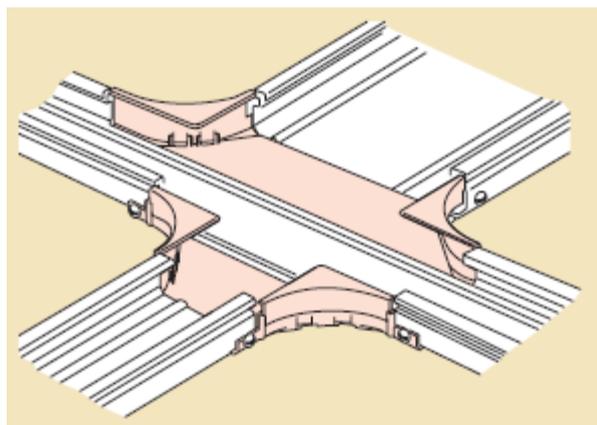

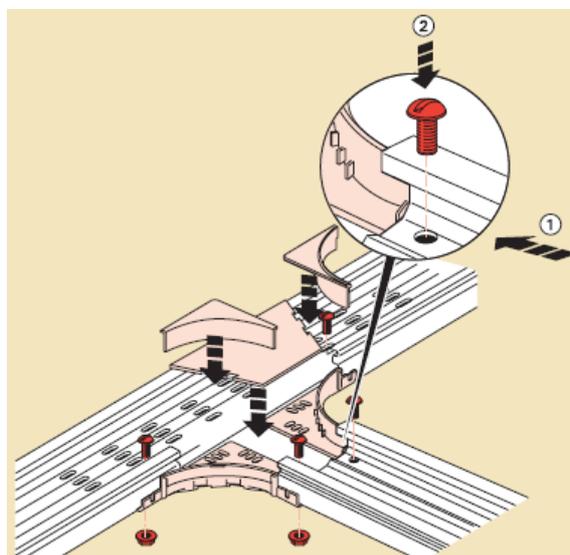

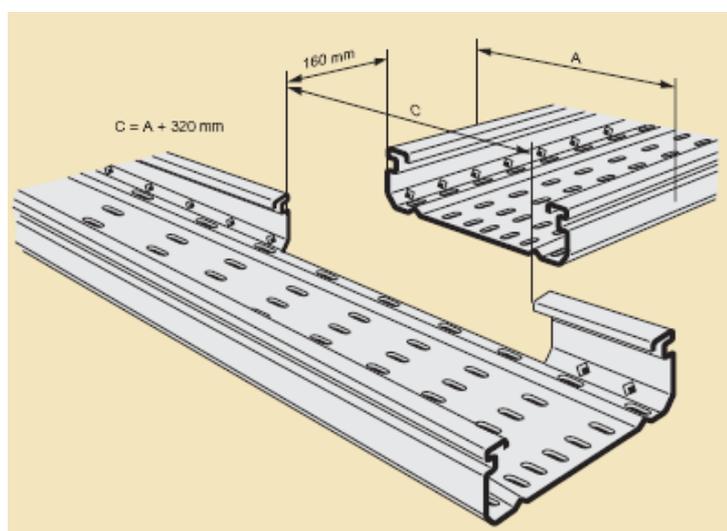

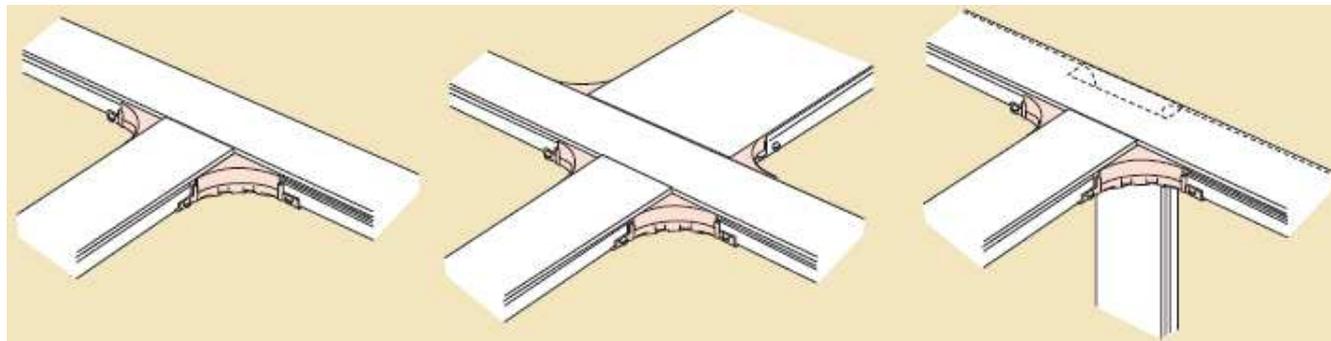

# PVC CABLE TRAYS

Number(s) : 6377 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48, 50 to 58/60 to 69/71 to 75/81 to 85/88/90/91/93, 6378 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48/50 to 58/70 to 75/60/90/91, 6379 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48/60/63/64/70 to 74, 6379 76/77/79/80/81/83/84/88/90/93 to 98

## 5. TECHNICAL CHARACTERISTICS (continued)

Installation of T kits ref 6378 60/70/71/72/73/74/75, 6379 60/70/71/72/73/74

kit contains 2 branch pieces + 1 base plate to assemble into 1 finished tee piece.  
Use 1 kit for a tee or 2 kits for a cross piece, all width are possible.

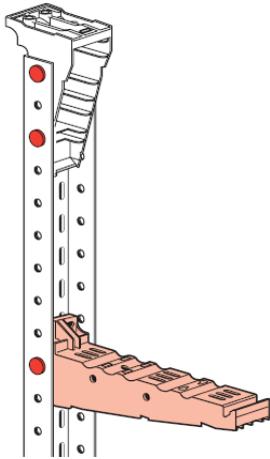

# PVC CABLE TRAYS

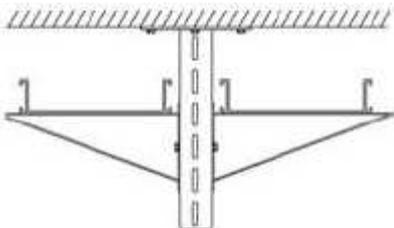

Number(s) : 6377 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48, 50 to 58/60 to 69/71 to 75/81 to 85/88/90/91/93, 6378 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48/50 to 58/70 to 75/60/90/91, 6379 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48/60/63/64/70 to 74, 6379 76/77/79/80/81/83/84/88/90/93 to 98

## 5. TECHNICAL CHARACTERISTICS (continued)

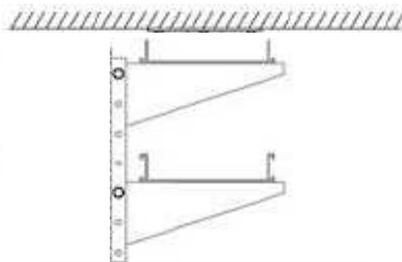

Repartition of safe working loads in single pendant with ceiling brackets + 1 pendant channel PVC.

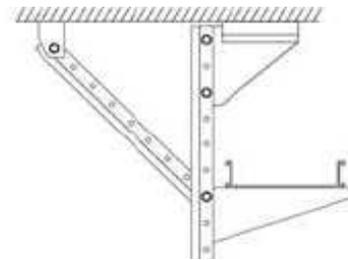

Safe working load max with 1 cantilever arm = 67 daN

If more than 67 daN must be supported, the load must be evenly distributed to both sides of the pendant.  
Total load (310 daN max)

67 daN max on the same side of pendant

Reinforced installation (ceiling brackets + 1 pendant channel PVC), safe working loads max 310 daN

Number(s) : 6377 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48, 50 to 58/60 to 69/71 to 75/81 to 85/88/90/91/93, 6378 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48/50 to 58/70 to 75/60/90/91, 6379 00 to 08/10 to 18/20 to 28/30 to 38/40 to 48/60/63/64/70 to 74, 6379 76/77/79/80/81/83/84/88/90/93 to 98

## 5. TECHNICAL CHARACTERISTICS (continued)

Classification of PVC cable tray according to EN 61537 standard:

Corrosion	No corrosion
To earth the system	Not applicable
Resistance to chemical agents	Excellent resistance
Resistance to flame propagation	Non-flame propagating
Electrical continuity characteristic	Without electrical continuity characteristics (PVC)
Electrical conductivity	Electrically non conductive (PVC)
Coating	No coating
Application temperature	- 20°C à + 60°C
Storage, transport and installation temperature	- 5°C à + 60°C
Perforation of cable tray base : A : unperforated profiles B : perforated profiles	A : up to 2% B : between 2% and 15%
Resistance to impact	Max. 20J (see table below)

Resistance to impacts :

The products are tested at - 5°C temperature according to EN 61537 standard.

		Width (mm)							
		75	100	150	200	300	400	500	600
Height(mm)	50	5 J	5 J	10 J 20 J <sup>(1)</sup>	10 J	10 J	10 J		
	75	5 J	10 J	10 J 20 J <sup>(1)</sup>	20 J	20 J	20 J		
	100				20 J				

(1) Unperforated
